Advising Policy

1) It is required for current students to pass the MEE Foundations classes before enrolling in upper-level (3XXX-4XXX) courses. Foundations courses are: TECM 2700, MATH 1710, PHYS 1710/1730, MEEN 1000, MEEN 2210, MEEN 2302. The overall GPA for the Foundations courses must be 2.5. Students with a Foundations GPA lower than 2.5 must meet the 2.5 minimum before enrolling in upper-level courses.

2) Transfer students are required to pass lower division prefix ENGR, and MEEN level courses (1XXX and 2XXX) before enrollment in the upper-division (3XXX and 4XXX) courses. However, enrollment of the upper division courses in the beginning semester would be permitted if the student enrolls in the required lower division courses in the same semester.

3) Students who enroll in the upper division courses, without meeting above requirements, will be dropped from the courses by the MEE Department administration.

4) The equivalency evaluation of transfer courses with ENGR and MEEN prefix courses in the MEE curriculum will be made by the MEE faculty advisors with input from the faculty in charge of teaching those courses. Catalogue information and the syllabus for each transfer course must be provided by the student for evaluation.

5) Two energy electives and two technical electives are required. Courses must be selected from the list of MEE approved elective courses. See the MEE office for the most up to date list of offerings as new classes are added regularly.

6) Per the College of Engineering catalog, students who make below a C two times in the same course are subjected to dismissal from the program.

7) A minimum GPA of 2.0 is required for graduation.

8) All degree specific courses require a grade of C or higher for graduation.
