

### **Applying to the MS (BMEN)-MS (DS) option:**

1. Apply to the MS in Biomedical Engineering as directed by the College of Engineering at <https://biomedical.engineering.unt.edu/graduate/admissions>. You will need to pay a \$75.00 application fee.
2. Complete a 2nd ApplyTexas application, selecting Master of Science in Data Science as your chosen degree. When you apply through ApplyTexas, select “pay by check.” Do not remit an application fee for this second application. You will also not need to submit transcripts for this second application, as we will already have them on file. But, after you have received access to the MyUNT portal (it takes 2 to 3 days to get access to MyUNT portal after you submit ApplyTexas application), you will need to submit all other required documents, as mentioned at: <https://informationscience.unt.edu/admission-ms-data-science>
3. Please email at [BMEN-DS-Admit@ad.unt.edu](mailto:BMEN-DS-Admit@ad.unt.edu) your ApplyTexas application numbers of BOTH your Engineering application and your MS in Data Science application. We will waive the 2nd application fee (and you will not submit payment). In summary, you will only pay one application fee for both applications.
