Associate Professor Wei Jin
Department of Computer Science and Engineering
College of Engineering
Text and Web Data Mining, Information Retrieval, Biomedical and Healthcare Informatics

Ontology and Semantics Driven Representation Learning

Text and Web Mining
- Active projects in association discovery from large document collections and the Web
- Social network analysis and community detection
- Wikipedia-supported data mining and applications

Biomedical and Healthcare Informatics
- Active projects in mining biomedical literature for knowledge discovery
- Improving knowledge discovery through integrating domain knowledge and human intelligence
- Representation learning through incorporating corpus, ontology, and semantics

Biomedical Text Mining

Association Discovery and pattern analysis

Wikipedia-supported Knowledge Representation and Mining Framework

Concept Association Graph Construction & Search
