

Associate Professor Wei Jin **Department of Computer Science and Engineering**

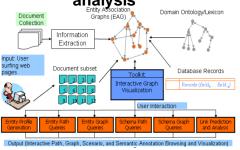

College of Engineering Text and Web Data Mining, Information Retrieval, Biomedical and Healthcare **Informatics**

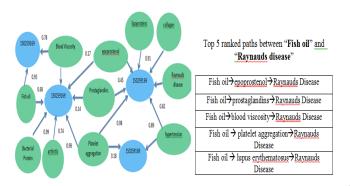

Ontology and Semantics Driven Representation Learning

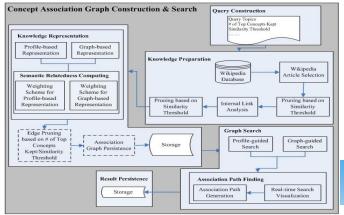

Association Discovery and pattern analysis

Biomedical Text Mining

Wikipedia-supported Knowledge **Representation and Mining Framework**

Text and Web Mining

- Active projects in association discovery from large document collections and the Web
- Social network analysis and community detection
- Wikipedia-supported data mining and applications

Biomedical and Healthcare Informatics

- Active projects in mining biomedical literature for knowledge discovery
- Improving knowledge discovery through integrating domain knowledge and human intelligence
- Representation learning through incorporating corpus, ontology, and semantics
