**Professor Xiangnan Zhong**
Department of Electrical Engineering
Assistant Professor
Networked Intelligence Control Systems Laboratory
Computational Intelligence, Cyber-Physical Systems, Networked Control Systems, Intelligent Control, Robotics, Machine Learning

---

**Computational Intelligence in Networked Control System – Smart City**

- [Image of computational intelligence concept]

**Adaptive Learning for End-to-End Autonomous Mobil Robot**

- [Image of pedestrian flow and robot surveillance]

**Goal:**
Management of smart city infrastructure

**Applications:**
- Gas/oil pipelines
- Water management
- Computer network
- Public transportation
- Power grid to healthcare.

---

**Multi-agent learning-based algorithms on UAV**

- [Image of multi-agent learning algorithms on UAV]
